ARTIST STATEMENT:
I think of my structures like Heart of Glass as spacial line drawings, and construct them to appear as though the lines they are made of flow into each other with both grace and aggression. I wanted this particular piece, with its tightly wrapped mirror-shard heart, to feel fragiley resilient. The heart, which is suspended from its own single, thin wire, is separate yet integral to the larger, more open, spherical body, itself suspended from a tangle of umbilicals.
